“The law does not care about truth or justice, but about legalisms”. So stated a Great Course on “The Origins of Evil” many years ago. After personal experiences with the law, I believe it must change from a sick business of enslaving the people to a genuine profession of human truth and justice for all. The issues I raise are: investigation, prosecution, initial charges, plea bargains, right to jury and due process, law readings, judicial meetings, open records, suggestibility diseases, rulings and appeals, computer gaming, contempt and finally over criminalization. (Corrections and suggestions are always rejected by government employees because they mean more work--so the reply is always to claim their system is “the best”, and offered improvements are unnecessary or unacceptable being from ex-criminals or other offenders who criticize the law).

These thirteen treatments is to bring to fulfillment the “Critical Legal Studies Movement” which realized that the law is necessary evil of an artificial Godless arrangement of power, run by self-enriching self-righteous pseudo-erudite know-it-all arrogant tyrants fascists and crooks (likely the largest employment group in the US), imposing a coherent chaos-preventing and resolving totalitarianism necessary because the people are coerced by custom, threats, force and punishments, because the people no longer live by the Ten Commandments and the Founders’ Principles but by the suggestibility diseases of the Fraud Press & Media. There are few real differences between countries’ law systems except in whom and how enriched and whom and how controlled and destroyed. Truth and justice in law are replaced by legalisms which are sanctimonious mechanisms of evidence creation. Those in the law will never really assist those who cogently criticize their law worship, nor will journalists who do not want to alienate favored politicians. The most important need for the law is to preserve its worshiped status in the minds of the people so all in the law can be the bullies they want to be and they can continue to ignore truth and justice.

## Investigation

The psychology of investigators is to “get ‘em.” No one invests time and energy into an effort without making “success” their goal. To mercifully offer corrections is prohibited and counterproductive. Thus, “subornation” is automatic...denied of course, but undeniable in one’s unconscious. The slogan, “Innocent until proven guilty”, had been replaced by “Innocent until investigated.” An investigator’s job is to create GUILT. The only way for truth and justice is for the law to prohibit any admission of evidence not collected by video camera recordings of every contact from start to finish in the acquisition of evidence (Parenthetically, video cameras should also be required for all in government at all times, from lawyer-run Pharmacy Board high school graduates to the White House--Mandatory video cameras for all government employees is a truism that will occur soon--It has to, because all government is so corrupt). When forthcoming, lie detectors will be mandatory for all in all government activities. Investigators proceed as if “guilty” has been already declared which is unjust, and there is “no equal protection”.

## Prosecution

I have discovered that the sub rosa self-worth of prosecutors is their conviction rate. Thus, prosecutors are a multiple of their investigators as in 1 supra. Prosecutor’s business is to fabricate “We have no comment” to plea bargains after they “pile-on” by overt flood of initial charges which compel the plea bargain. Then, by discrete fashion the prosecutors violate the plea bargains by more “pile-on” which negates their previous “no comments” by loud malicious comments heard only by the impressionable judge. Prosecutors are robots of the universal motivation innate to everyone in legal bureaucracies from lawyer-run Medical Board desk clerks to the Congress, all of whom are eager bullies “sticking together” in a fascist gang promoting and defending each other as only government bureaucracy members will do in unity. There is no bigger corrupt “all for one and one for all” than government employees supporting and echoing each other. The only way for truth and justice is for the law to mandate the finding of “guilty” for all initial charges and for all sub rosa plea-bargain-breaking charges made to the judge. “Innocent” unless guilty for all initial charges. Drop a

charge or one found “innocent”, case dismissed. Each initial charge is a “juror.” Prosecutors proceed as if “guilty” has been already declared, which is unjust, and there is “no equal protection.”

### Initial Charges

Prosecutors always inflate their initial charges to overwhelm the defendant to accept a plea bargain, i.e., fifty initial counts to start with but planning on really using only the three “strongest” counts. That ninety percent of prosecutions are resolved by plea bargains is outrageous except for the “easy-money” enriched lawyers and judges. “Hoaxes” now include initial counts and plea bargains. Plea bargains are a “work less for more money” business scheme enriching all involved in the law except the defendant. “Plea perjury” is probably a more accurate term for what is going on. The only way for truth and justice is for the law to prohibit plea bargains. Inflated initial charges are creations of false evidence and proof that “Equal protection of the laws” is a joke like most of the flattering “respect-law” promotions are delusions, like “Innocent until proven guilty.”

### Plea Bargains

The Supreme Court has ruled that unless from a truth-pleading witness, untrue statements from lawyers and judges are not subject to laws punishing false statements. Thus, untrue statements force defendants to accept inequality before the law and no longer are entitled to jury of peers as constitutionally required. In fact, most legalisms are often untrue in some sense, and thus enable false evidence fabrication by dogmatic legal decree. Plea bargains mitigate the “ignorance of the law is no excuse” legalism; so that most people will not have to know all the legalisms filling law libraries, because the plea bargain really says, “forget about not knowing about it.” The only way for truth and justice is for the law to require the “right to jury and due process” for all. Plea bargains actually are a mutual “conflict of interest” scam so both defense and prosecution get well paid for doing less work than a jury trial.

### Right to Jury and Due Process

The Constitution requires the right to jury (6th amendment) and due process (5th amendment) for all to be deprived of liberty or property. Thus, plea bargains are outrageous unconstitutional deprivations, because the pleader gets neither a jury nor due process--just a less expensive business deal from the legal system. The only way for truth and justice is for the law to decree that “all initial charges are a jury equivalent”; and as in a jury, all “jurors” must agree to guilt or the defendant is dismissed as innocent. The initial charges ARE the “inanimate jury”--fifty charges will need fifty “guilties” from the person jury or judge. With this change, litigators will be discrete, precise, and cautious in their proceedings, especially “initial charges” (as in 2 & 3 supra), and who knows, maybe the prosecutors and judges will have to work always in jury trials instead of easy-money easy-work plea bargains.

### Law Readings

In all legal matters, there are often hurried recitation of numbers identifying a law relevant to the issues being deliberated. Not knowing the law or its legalisms or its relevance or its potential to help or hurt, those involved have the right to hear the entire law at the time it is being used. If legalisms determine all, not to have them brought to full awareness is legal mischief and abuse of due process. If “Ignorance

of the law is no excuse,” all have the right to hear the law officially read at least once in the proceedings. The only way for truth or justice is for the stated law to be slowly read into the proceedings after its first mention with note-taking allowed so reasonable actions are possible if thought helpful. The legalisms presented must be known and understood. Almost all legalisms are contrived means of false evidence creation to enrich politicians and their buddies who will benefit from the legalism by an alleged “common good.” There is a “right” not to be “ignorant” of all details of the legalisms and their contriving.

### Judicial Meetings

In legal matters, often the attorneys withdraw to a meeting with the judge. This is “collusion” and must stop. The only way for truth and justice is for the law to require video cameras, (as in 1 supra) for all in all acts by government workers for everything. All must know what goes on in judicial meetings (and everywhere else in government). Technology must embrace the law too, enabling more truth and justice than ever possible from current primitive legal ordure and masquerade.

### Open Records

As the opening of medical records has allegedly enhanced medical care, the opening of ALL legal records should be mandated by law for the sake of truth and justice. I will say it again: Truth and justice require the opening of all legal records. It was done to the medical profession; it must be done to our legal system of injustice and untruth. The opening of medical records has made the medical profession to be the biggest target and source of money for the law profession which does not care about truth or justice. The opening of legal records will provide another income target for attorneys.

### Suggestibility Diseases

The epigenetic “Suggestibility Disease” evils of the law (and press & media) are: social engineering, collective unconscious, propaganda, advertising, and public relations--all promoting the unnatural (prohibited by “Nature and Nature’s God” in the Constitution)--which always turns into pollution, entropy and evil. Suggestibility and manipulation evils (detailed on the World Wide Web) which create false accusations and hoaxes are made possible in government and the law by

1. Asch GROUPTHINK to conformity,
2. Eichmann benign SUGGESTIBILITY and immunity to evil and to the sexual unnatural which destroys faith, hope, and charity (Goebbels, I think, about the Holocaust, wrote how seducing people to immoral sex led to slow irreligion and willingness to do evil when ordered to do so),
3. Milgrim SHOCKMACHINE OBEDIENCE to the immoral,
4. Zimbardo POWERMADNESS control,
5. LAW WORSHIP capitalist LEGALISMS promoting the acting out of emotions instead of truth and justice,
6. PRESSMEDIA fabrications and electrono-celluloid-ink fascist destruction of virtue and transcendence,
7. Black Lives Matter VICTIMISM paralysis into hate or dependency, and, worst of all,

8. College professor INDOCTRINATION (instead of “education”) and SEDUCTION of students into self-deluded self-righteous liberal hate-projected mega-arrogance,
9. The absence of Nigro THEOGEOCALCULUS which establishes Natural Law [1].
10. The only way for truth and justice is for the law to promulgate and review these diseases at each deliberation. Politicians, lawyers and judges must “sign off” on these diseases monthly as part of licensure to practice (So should journalists).
11. Those who perpetrate false accusations and hoaxes must be punished exactly as if they were the ones who did what they fabricated and hoaxed to hurt others.

## Rulings and Appeals

I have discovered that the law is nothing but a capitalist money-making “necessary evil” reducing chaos as an unconstitutional “established religion” with judges as mini-gods and lawyers as saints and clergy. Robed ritualistic charades, sensational bullying, and pseudo-religious condescension’s fill courtrooms. There is no art (except “bullying”) or science in law (as required in the Medical Profession)...The law is a necessary evil...or, at best, a pseudo-sport seeking suggestibility-victory, making money for all involved above all, and promoting the “common good” for politicians, judges, lawyers, and their buddies and bureaucrats. And, by the way, sport-like, whoever scores the most legalisms wins! Or the law is a Scrabble Game with the god-judge spelling “innocent” or “guilty” by using the legalisms offered on small cards. The law does not care about truth or justice except for public relations sloganeering such as “equal protection before the law,” “innocent until proven guilty,” “the truth, the whole truth and nothing but the truth,” and other meaningless, how-great-we-are contemptibility-prohibiting dogmatisms. But the most self-discrediting finding for the law: If the law gives truth and justice, why does it have “appeal courts”? Not one appeal court, but many going up to the Supreme Court? Each appeal level is proof that truth and justice were not expected from the prior court. Not once, but many times over and over. A cynic would say this is just “good business” providing plenty of work for generations of law school graduates who will need more laws enslaving all, from what to drink to what to think; necessary because the people are no good and have no more virtue than their corrupt political leaders. Appeal courts are proof that the law is a sham. The final conclusion is that the only way for truth and justice is for the law to go to computer gaming.

## Computer Gaming/Artificial Intelligence

Computers are taking over jobs everywhere. Computer gaming is creating fun and transcendence to fighting battles and wars. The law must replace itself with computer gaming. If unwilling to do so, the Medical Profession (especially psychiatry) and/or the Roman Catholic Church, must do so and cure the world of the law cancer and its metastatic pretense of settling conflicts and differences. Such “Hippocratic gaming” and artificial intelligence would include legalisms, physical variables, transcendentals, community universals, Hippocratic humanbeingness [2], the Roman Catholic Mass Mantra

[3], and virtue [4]. Computer programming of human conflict resolution will provide more truth and justice, more humanbeingness and more life, sacrifice, virtue, love, humanity, peace, freedom and natural death without fear, than the law has ever done. Got a problem? Do not use the law...Create and use Hippocratic Computer gaming artificial intelligence as essential for truth and justice. Do not ignore the law--just fear it and use a better more truthful and just way, avoiding, as much as you can, the money-mad “I will make them pay” advertising lawyers, arrogant self-deluded judges, and the temporarily-self-righteous sequence of truth-less justice-less bully-contest appeal courts. The law demonizes words, while computers will spiritualize all by treating words as the angels they are [5,6] and remove corrupt politicians from enslaving the people.

## Contempt

Finally, the law’s “contempt of court” declarations to suppress others and to defend itself from criticisms are absolute proofs of its inability to be much more than “contemptible.” The law should not get away with all this any longer. It is time for a change to something caring about truth and justice more than a false legalism which censors and dismisses cogent criticisms by calling them “contempt” (which itself is “contemptible”). The self-sanctification of the law is outrageous.

## Over Criminalization

Because of DNA clearance, over 300 men have been released after accumulating over 6000 years of unjust imprisonment thru 2014, but 15 had been already executed. In 2015, another 149 were DNA freed for false imprisonment exceeding 14 years each in jail, but another 14 had already been executed. Overall, that is about eight centuries of accumulated unjust imprisonment and dozens of unjust executions (Maybe “contempt” is the right word for the law?). One must wonder how many are over criminalized still, because they do not have DNA possibility of showing their innocence. Check out your state’s “Innocence Project”! It is not run by prosecutors bragging about their conviction rates nor by Bar Associations with their adore-the-law propaganda. Check out the exoneration rate for your state. The Statute of Limitations for legal malpractice will be dismissed so the responsible lawyers and judges and their estates can be sued when an innocent person is finally de-criminalized.
